

Damien Homiak

Healthcare Operations & Administration

Patient access · Care coordination
Referral management · Workflow improvement

Healthcare operations professional focused on patient access, care coordination, and process improvement. I ran day-to-day operations for a 10+ clinician telehealth behavioral health practice and mapped care-transition workflows inside an acute psychiatric hospital. Lean Six Sigma trained; BS in Healthcare Administration begins in July.

HEALTHCARE OPERATIONS HIGHLIGHTS

- ✓ Coordinated patient intake and scheduling workflows
- ✓ Managed referral tracking and provider coordination across 160+ providers
- ✓ Supported insurance-based behavioral health operations
- ✓ Built systems that improved client access and clinician efficiency
- ✓ HIPAA-compliant documentation and communication
- ✓ Process improvement and workflow design with Lean Six Sigma

SELECTED WORK

REFERRAL MANAGEMENT · CARE COORDINATION

Built the referral tool the EHR did not have

160+ providers, filterable by plan | ~15 plans standardized | \$0 new software

For a mostly Medicaid population, I built one HIPAA-aware tool that filters in-network providers by specialty and accepted insurance, with a verification step so no client is referred on unconfirmed coverage.

PATIENT ACCESS & INTAKE

One intake pipeline, a private dashboard per clinician

3 intake channels merged into 1 | minimum-necessary access | documented runbook

I consolidated three disconnected intake sources into one routing pipeline so every inquiry is assigned, while each clinician sees only their own caseload, inside the existing HIPAA agreement.

CARE TRANSITIONS · INSTITUTE OF MENTAL HEALTH, SINGAPORE

Closing a post-discharge follow-up gap

6 root-cause categories | 3 fixes designed | benchmarked to NICE, MOH, Action Alliance

I used root cause analysis to map why high-risk post-discharge calls were missed, then designed a closed-loop follow-up system that makes forgetting structurally hard.

"Damien has that rare combination of being both genuinely warm and competent. If you need someone who can organize complexity, strengthen systems, collaborate thoughtfully, and reliably move projects across the finish line, Damien is the person you want in your corner."

Cappy Shapiro · Clinical Manager, Femme & Them, PLLC

CORE COMPETENCIES

Patient access & scheduling · Insurance verification & benefits · Referral management · Care coordination · Prior authorizations · Care transitions · HIPAA-compliant documentation · Workflow improvement · Provider support · Data tracking & reporting

SYSTEMS USED

- EHR / practice management
- Telehealth platforms
- Google Workspace + Apps Script
- Scheduling & intake tracking
- Microsoft Excel & Smartsheet
- Gusto payroll · Canva

RECENT EXPERIENCE

Practice Operations

Femme & Them, PLLC · behavioral health
